HAVE YOUR HEART HEALTH CHECKED

Statistically speaking, 33% of men's and 20% of women's hearts are diseased.

POSSIBLE CAUSES

- Calcification of blood vessels
- Changes to the heart muscle

TYPICAL SYMPTOMS

- Chest pain
- Nausea
- Back pain
- Heartache
- Tightness in the chest
- Shortness of breath
- Fatigue
- Heart disease can also be asymptomatic

POSSIBLE SERIOUS CONSEQUENCES

- Heart attack
- Arrhythmias
- Sudden cardiac death
- General heart diseases

Cardisiography (CSG) examines the electrical field of the heart for irregularities.

Using AI, CSG can detect heart diseases in their early stages, allowing for early treatment and the avoidance of serious consequences.
